Back-Up Hi-Definition Images
(Easy and correct way of copying to a DVD)

1. Get ready a recommended disc

Please use the recommended discs stated below.
Using discs other than those recommended may cause problem when copying to the DVD and when playing back the DVD.

Recommended discs

	DVD-R	DVD-RW	DVD-R DL (single-sided double layer)
Brand	JVC TDK Verbatim SONY	JVC	JVC Verbatim

Caution

● Only DVD-R and DVD-RW discs can be used.

● Recording and playback may not function properly if the recording side is scratched or dirty.

2. Set up each device before copying

DVD Burner
(CU-VD40/CU-VD20)

USB cable

Camera (GZ-HD3)
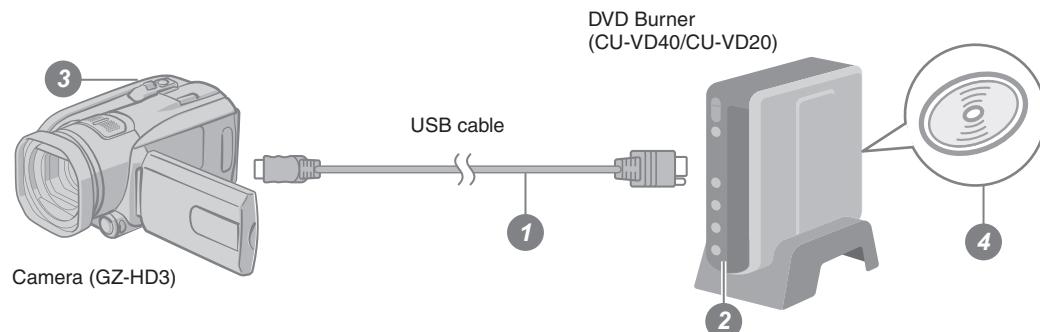

1 **Connect the USB cable provided with DVD Burner (CU-VD40/CU-VD20)**

2 **Turn on the DVD Burner**

After turning on the power, wait for approximately 20 seconds before proceeding to step **3**.
The burner may not function properly within this 20 seconds.

3 **Turn on the camera (GZ-HD3)**

4 **Insert a new recommended disc into the DVD Burner**

Next, operate the camera (GZ-HD3). Proceed to step 3.

3. Copy all images to the DVD

Perform operations on the camera.

(Camera's LCD screen display)

1 **Confirm that the display on the right appears on the LCD screen of the camera (GZ-HD3)**
